DETAILED ACTION

Claims 24-28 are under consideration in this application.

Election/Restrictions

The restriction requirement is deemed sound and proper and is hereby made final.

Again, this application has been examined to the extent readable on the elected compounds of wherein X is pyridyl (optionally substituted by non-heterocyclic groups), Y is aryl (optionally substituted by non-heterocyclic groups), Z is pyridyl (optionally substituted by non-heterocyclic groups), $R^1 - R^{12}$, A, B and W represents non-heterocyclic groups, A^1 is N and A^2 is CR^{12} as set forth in claim 1, exclusively. All additional heterocycles and heteroaryls pertain to nonelected subject matter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1625

Claims 24-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cosford et al.

Again, Cosford et al. generically embrace the instant compounds. Note the compounds of formula (I) wherein X is pyridyl, Y represents aryl, A¹ is N and A² is carbon.

Applicants allege that Cosford et al. is not a reference for purposes of 35 U.S.C. 103(a). This is not persuasive because Cosford et al. has an effective filing date of December 18, 2001 well before the instant date of April 3, 2003.

Applicants appear to argue that one having ordinary skill in the art would not have been motivated to produce the compounds encompassed by the claims. The motivation is not abstract but is always related to the properties or uses that one having ordinary skill in the art would have expected the resulting compound to exhibit. In situations involving chemical compounds bearing a close structural similarity, the requisite motivation stems from the expectation that compounds exhibiting closely similar structures will exhibit similar properties. Example 90 therein differs only in having an oxy pyridine attached to the phenyl group rather than having the pyridine attached directly to the phenyl group. However, Cosford et al. recites that a bond or oxygen may be attached to the Y group therein. Note section [0035] therein. In the situation here, one would not have to modify the disclosure of Cosford et al., but merely employ compounds that are generically embraced in a narrow manner by the disclosed formula of As previously discussed, the requisite motivation for producing the claimed compounds stems from the fact that they are generically disclosed. Therefore, one having ordinary skill in the art would have found it prima facie obvious to select any on the compounds embraced by the generic formula, including those of the claims.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
